

**Ride, Travel, Drive Side by Side,
Absolute refinement.**

CHANGJIANG
it's more than 70 years of expertise in the sidecar !

It was at the beginning of the 1950s that the Changjiang factory was born following the request of the Chinese army who wanted to equip its fleet of 1000 sidecars.

For the sale to the public of its sides, Changjiang has equipped its models with the same 750cc flat twin engine until 2017.

Now, the Changjiang factory offers a range of side with a modern engine developed by the CF Motors factory. More efficient, more reliable, more economical and more ecological, it brings all the qualities expected by lovers but also neophytes.

Today, the Changjiang brand is more than 2000 machines sold each year around the world. A true side specialist for 70 years, Changjiang gives a new dimension to the side by democratizing its use. With Changjiang, the sidecar becomes a modern vehicle in its own right for daily trips as well as for the ride. The Changjiang sidecar, a vehicle open to everyone.

Finally, for 2020 the Chinese firm will launch a motorcycle, the same one used for the manufacture of the sidecar. A motorcycle with a strong identity, comfortable, easy, and pleasant with a neo-retro look, equipped with the same engine.

For the European market, the Dip company has concluded an exclusive distribution agreement and takes the reins of the brand's destiny with the firm intention of giving a new place to this vehicle and establishing the Changjiang range in all countries.
